PROFESSIONAL SUMMARY

DevOps Engineer and Software Developer with experience in designing, automating, and optimizing cloud infrastructure across AWS and Azure. Skilled in CI/CD pipeline development, Kubernetes orchestration, Infrastructure as Code, and containerized deployments using Terraform, Azure Bicep, Docker, Helm Charts, and Kubernetes. Experienced in managing scalable multi-environment systems, reducing cloud infrastructure costs, and improving deployment efficiency through automation. Proficient in Java, JavaScript, Python, PHP, React Native, Express.js, and cloud-native technologies.

CORE COMPETENCIES

- Cloud Infrastructure (AWS, Azure)
- Infrastructure as Code (Terraform, Azure Bicep)
- CI/CD Automation (GitHub Actions, Azure DevOps Pipelines, ArgoCD)
- Containerization & Orchestration (Docker, Kubernetes, Helm Charts)
- Kubernetes Management (kubectl, Helm, Cluster Maintenance)
- Monitoring & Deployment Strategies
- Multi-Environment Management (Dev, Test, Staging, Production)
- Cost Optimization & Resource Management
- Backend Development & APIs
- Infrastructure Automation & Cloud Provisioning

TECHNICAL SKILLS

Category	Skills
Cloud Platforms	AWS, Azure
DevOps & Infrastructure Tools	Terraform, Azure Bicep, Azure CLI, GitHub Actions, Azure DevOps Pipelines, ArgoCD, Helm Charts, kubectl, Docker, Kubernetes
Programming Languages	Java, JavaScript, Python, PHP, Shell Scripting

Category	Skills
Frameworks & Technologies	React, React Native, Expo CLI, Express.js
Operating Systems	Windows, Linux
Concepts	CI/CD, Infrastructure as Code (IaC), Cloud Computing, OOP, SOLID Principles, Containerization, Automation

PROFESSIONAL EXPERIENCE

AutomationHQ Inc.

Lead DevOps Engineer | Mar 2025 – Present

- Architected and managed scalable cloud infrastructure across AWS and Azure using Terraform and Azure Bicep.
- Designed and implemented end-to-end CI/CD pipelines supporting automated deployments across multiple environments (main → dev → staging → production).
- Reduced AWS cloud costs by 60% through resource optimization, right-sizing, and monitoring strategies.
- Reduced Azure infrastructure costs by 75% by redesigning architecture and eliminating unused resources.
- Deployed and managed Kubernetes clusters ensuring scalability, high availability, and fault tolerance.
- Managed Helm Charts, Kubernetes deployments, and cluster configurations using kubectl.
- Automated infrastructure provisioning and deployment workflows using GitHub Actions and Azure DevOps Pipelines.
- Standardized multi-environment configurations improving deployment consistency and reducing failures.
- Led on-premise deployment solutions for enterprise clients ensuring seamless integration and delivery.
- Improved deployment reliability and reduced manual intervention through automation.

Software Developer & DevOps Intern | Mar 2024 – Mar 2025

- Assisted in building and maintaining CI/CD pipelines using GitHub Actions and ArgoCD.
- Worked with Terraform, Azure Bicep, and Azure CLI for infrastructure provisioning and automation.
- Deployed and managed containerized applications using Docker and Kubernetes.
- Maintained Kubernetes clusters, Helm Charts, and deployment configurations.
- Collaborated on monitoring, troubleshooting, and optimizing cloud-based systems.
- Developed and maintained deployment automation workflows.

PROJECTS

bicepBrew | Azure Bicep, GitHub Actions

- Developed a hands-on learning platform for Azure Bicep with integrated CI/CD pipelines.
- Automated deployment workflows to demonstrate Infrastructure as Code best practices.
- Implemented GitHub Actions workflows for automated infrastructure deployments.

Cal-Get | React Native, Expo CLI

- Built cross-platform Web, Android, and iOS applications from scratch.
- Added custom themes, reusable text components, and spacer components.
- Developed authentication screens and optimized navigation and user experience.

Cal-Get Backend | Express.js, JWT

- Designed and implemented secure REST APIs using JWT authentication and bcrypt hashing.
- Created signup and sign-in routes from scratch.
- Ensured secure user authentication and session management.

Movie Recommendation Website | HTML, PHP, CSS, SQL

- Developed frontend, backend, and database architecture from scratch.
- Used OOP concepts in PHP for backend development.
- Implemented movie recommendation and data management features.

EDUCATION

Master of Computer Applications (MCA)

Savitribai Phule Pune University, Pune
2024 (Result Awaiting)

Bachelor of Computer Applications (BCA)

Indira College of Commerce and Science, Pune
2022
CGPA: 7.85 | Percentage: 73.55%

Higher Secondary Education (12th)

Kasturba Gandhi College, Ahmedpur, Latur
2019
Percentage: 59.38%

Secondary Education (10th)

Podar International School, Solapur
2017
CGPA: 8.6 | Percentage: 77.2%

KEY ACHIEVEMENTS

- Achieved 60–75% reduction in cloud infrastructure costs across AWS and Azure.
- Built and deployed production-grade CI/CD pipelines for full-stack applications.
- Successfully managed multi-cloud, multi-environment infrastructure at scale.
- Improved deployment efficiency and reduced manual errors through automation.
- Finalist in IT Division Coding Contest at “Kakushin” conducted by Nomura Services Pvt. Ltd. on 12 July 2023.
