PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience in **AWS and Azure cloud infrastructure**, CI/CD automation, and Kubernetes orchestration. Proven track record of reducing cloud costs, improving deployment efficiency, and managing scalable multi-environment systems. Strong expertise in **Infrastructure as Code (Terraform, Bicep)** and automated delivery pipelines.

TECHNICAL SKILLS

Cloud Platforms: AWS, Azure **DevOps Tools:** Terraform, Azure Bicep, GitHub Actions, ArgoCD, Helm
Containers & Orchestration: Kubernetes, Docker **Programming:** Java, JavaScript, Python, PHP **Frameworks:** React, React Native, Expo, Express.js **Concepts:** CI/CD, Infrastructure as Code, Cloud Computing, OOP, SOLID

PROFESSIONAL EXPERIENCE

AutomationHQ Inc.

Lead DevOps Engineer | Mar 2025 – Present

- Designed and managed **cloud infrastructure on AWS and Azure** using Terraform and Bicep.
- Built **fully automated CI/CD pipelines** enabling seamless deployment flow: **main** → **dev** → **staging** → **production** for frontend and backend systems.
- Reduced **AWS cloud costs by 60%** (from \$500 → \$200) through resource optimization and right-sizing.
- Reduced **Azure cloud costs by 75%** (from \$800 → \$200) via efficient infrastructure redesign.
- Deployed and managed **Kubernetes clusters**, ensuring high availability and scalability.
- Maintained multiple environments (**dev, test, staging, production**) with consistent configurations.
- Led **on-premise deployment implementations** for clients, ensuring smooth delivery and integration.
- Improved deployment reliability and reduced manual errors through automation and standardization.

Software Developer & DevOps Intern | Mar 2024 – Mar 2025

- Worked on **Terraform, Kubernetes, Helm, GitHub Actions, and Azure Bicep**.
- Maintained CI/CD pipelines and deployment workflows.
- Deployed and monitored containerized applications in cloud environments.

PROJECTS

bicepBrew | Azure Bicep, GitHub Actions

- Built a practical learning platform for Azure Bicep with CI/CD integration.

Cal-Get | React Native, Expo

- Developed cross-platform app (Web, Android, iOS) with reusable components and authentication.

Cal_Get_server | Express.js, JWT

- Implemented secure backend authentication with JWT and bcrypt.
-

EDUCATION

Master of Computer Applications (MCA) Savitribai Phule Pune University | 2024

Bachelor of Business Administration (Computer Application) Indira College of Commerce and Science | 2022

KEY ACHIEVEMENTS

- Achieved **60–75% cloud cost reduction** across AWS and Azure.
- Built **production-grade CI/CD pipelines** for full-stack applications.
- Successfully managed **multi-cloud and multi-environment infrastructure**.
